UNIT STYLE: REAL 3D, ACTS I AND II

Rounded low-poly models with real volume: lit faces, cast shadows, a team-colour rim and eight facings. Not to be confused with the earlier flat side-views.

A EIGHT FACINGS every unit can face any direction and keeps its volume

TANK

SOLDIER

HELICOPTER

B THE FAMILY yours (green), opposing (red), neutral (yellow)

C TRUE RELATIVE SIZE one person is 1.75 m; doors, floors and vehicles follow from that

D FOUR LEVELS OF DETAIL the same tank as the map zooms out

E MARKERS: RING ONLY WHEN SELECTED, BAR ON EVERY UNIT the ring sits around the hull, not the gun

How it is made: each model is a handful of boxes, prisms, cylinders and spheres, drawn with a z-buffer, flat shading, a cast shadow and a thin rim light in the team colour.
In the real game these would be actual 3D models in the engine with an orthographic camera: true rotation, live shadows, any angle, and the same models can be improved later by an artist.
